Engineering Drawing for Manufacture (Manufacturing Engineering Modular Series) Brian Griffiths

The processes of manufacture and assembly are based on the communication of engineering information via drawing. These drawings follow rules laid down in national and international standards. The organisation responsible for the international rules is the International Standards Organisation (ISO). There are hundreds of ISO standards on engineering drawing because drawing is very complicated and accurate transfer of information must be guaranteed. The information contained in an engineering drawing is a legal specification, which contractor and sub-contractor agree to in a binding contract. The ISO standards are designed to be independent of any one language and thus much symbology is used to overcome any reliance on any language. Companies can only operate efficiently if they can guarantee the correct transmission of engineering design information for manufacturing and assembly.

This book is a short introduction to the subject of engineering drawing for manufacture. It should be noted that standards are updated on a 5-year rolling programme and therefore students of engineering drawing need to be aware of the latest standards. This book is unique in that it introduces the subject of engineering drawing in the context of standards.

From reader reviews:

Wilma Blue:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each publication has different aim or goal; it means that publication has different type. Some people feel enjoy to spend their time and energy to read a book. They can be reading whatever they consider because their hobby will be reading a book. What about the person who don't like reading through a book? Sometime, man feel need book whenever they found difficult problem or perhaps exercise. Well, probably you will require this Engineering Drawing for Manufacture (Manufacturing Engineering Modular Series).

Randy Garrison:

This book untitled Engineering Drawing for Manufacture (Manufacturing Engineering Modular Series) to be one of several books in which best seller in this year, here is because when you read this publication you can get a lot of benefit upon it. You will easily to buy this kind of book in the book shop or you can order it by means of online. The publisher with this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Touch screen phone. So there is no reason to you to past this guide from your list.

Caleb Hutto:

The book untitled Engineering Drawing for Manufacture (Manufacturing Engineering Modular Series) contain a lot of information on this. The writer explains your ex idea with easy method. The language is very easy to understand all the people, so do not really worry, you can easy to read that. The book was written by famous author. The author brings you in the new period of literary works. You can read this book because you can keep reading your smart phone, or device, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can open their official web-site along with order it. Have a nice study.

Steven Strong:

As a university student exactly feel bored to reading. If their teacher inquired them to go to the library or to make summary for some reserve, they are complained. Just small students that has reading's heart and soul or real their pastime. They just do what the professor want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that studying is not important, boring and can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Engineering Drawing for Manufacture (Manufacturing Engineering Modular Series) can make you truly feel more interested to read.
