Coastal Lagoons: Critical Habitats of Environmental Change (CRC Marine Science)

Coastal Lagoons: Critical Habitats of Environmental Change (CRC Marine Science)

Dynamic and productive ecosystems, coastal lagoons play an important role in local economies and often bear the brunt of coastal development, agricultural, and urban waste, overuse from fisheries, aquaculture, transportation, energy production, and other human activities. The features that make coastal lagoons vital ecosystems underline the importance of sound management strategies for long-term environmental and resource sustainability. Written by an internationally renowned group of contributors, **Coastal Lagoons: Critical Habitats of Environmental Change** examines the function and structure of coastal lagoonal ecosystems and the natural and anthropogenic drivers of change that affect them.

The contributors examine the susceptibility of coastal lagoons to eutrophication, the indicators of eutrophic conditions, the influences of natural factors such as major storms, droughts and other climate effects, and the resulting biotic and ecosystem impairments that have developed worldwide. They provide detailed descriptions of the physical-chemical and biotic characteristics of diverse coastal lagoonal ecosystems, and address the environmental factors, forcing features, and stressors affecting hydrologic, biogeochemical, and trophic properties of these important water bodies. They also discuss the innovative tools and approaches used for assessing ecological change in the context of anthropogenically- and climatically-mediated factors. The book investigates the biogeochemical and ecological responses to nutrient enrichment and other pollutants in lagoonal estuaries and compares them to those in other estuarine types.

With editors among the most noted international scholars in coastal ecology and contributors who are world-class in their fields, the chapters in this volume represent a wide array of studies on natural and anthropogenic drivers of change in coastal lagoons located in different regions of the world. Although a significant number of journal articles on the subject can be found in the literature, this book provides a single-source reference for coastal lagoons within the arena of the global environment.

From reader reviews:

Trisha Sherman:

Typically the book Coastal Lagoons: Critical Habitats of Environmental Change (CRC Marine Science) will bring you to definitely the new experience of reading a book. The author style to elucidate the idea is very unique. In case you try to find new book to study, this book very acceptable to you. The book Coastal Lagoons: Critical Habitats of Environmental Change (CRC Marine Science) is much recommended to you to learn. You can also get the e-book from the official web site, so you can more readily to read the book.

Bobby Tremblay:

People live in this new morning of lifestyle always aim to and must have the time or they will get lots of stress from both way of life and work. So , whenever we ask do people have spare time, we will say absolutely indeed. People is human not really a huge robot. Then we question again, what kind of activity are there when the spare time coming to an individual of course your answer will certainly unlimited right. Then do you try this one, reading publications. It can be your alternative with spending your spare time, often the book you have read is definitely Coastal Lagoons: Critical Habitats of Environmental Change (CRC Marine Science).

Leona Hicks:

Is it a person who having spare time subsequently spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This Coastal Lagoons: Critical Habitats of Environmental Change (CRC Marine Science) can be the answer, oh how comes? A fresh book you know. You are consequently out of date, spending your spare time by reading in this new era is common not a geek activity. So what these publications have than the others?

James Sirois:

As a student exactly feel bored to help reading. If their teacher expected them to go to the library or even make summary for some reserve, they are complained. Just very little students that has reading's heart or real their hobby. They just do what the educator want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that reading is not important, boring in addition to can't see colorful images on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Coastal Lagoons: Critical Habitats of Environmental Change (CRC Marine Science) can make you experience more interested to read.
