**Radar Foundations for Imaging and Advanced Concepts (Electromagnetics and Radar)** Roger J. Sullivan

Through courses taught internally at the Institute for Defense Analysis, Dr. Roger Sullivan has devised a book that brings readers fully up to speed on the most essential quantitative aspects of general radar in order to introduce study of the most exciting and relevant applications to radar imaging and advanced concepts: Synthetic Aperture Radar (4 chapters), Space-time Adaptive Processing, moving target indication (MTI), bistatic radar, low probability of intercept (LPI) radar, weather radar, and ground-penetrating radar. Whether you are a radar novice or experienced professional, this is an essential reference that features the theory and practical application of formulas you use in radar design every day. With this book, you are taken step-by-step through the development of modern airborne microwave radar, up to the cutting edge of emergent technologies including new results on theoretical 2D and 3D SAR point-spread functions (PSF) and current discussions concerning dechirp/deskew processing, layover in SAR images, vibrating targets, foliage penetration, image quality parameters, and more. Plus, for students of electrical engineering, physics, and radar, this book provides the best source of basic airborne radar understanding, as well as a broad introduction to the field of radar imaging.

### **From reader reviews:**

#### **Mark Frey:**

Have you spare time to get a day? What do you do when you have considerably more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a wander, shopping, or went to typically the Mall. How about open as well as read a book entitled Radar Foundations for Imaging and Advanced Concepts (Electromagnetics and Radar)? Maybe it is to be best activity for you. You recognize beside you can spend your time with the favorite's book, you can wiser than before. Do you agree with the opinion or you have different opinion?

#### **Georgianna Menendez:**

People live in this new morning of lifestyle always attempt to and must have the time or they will get lots of stress from both lifestyle and work. So , if we ask do people have free time, we will say absolutely without a doubt. People is human not a robot. Then we ask again, what kind of activity do you have when the spare time coming to an individual of course your answer will probably unlimited right. Then ever try this one, reading ebooks. It can be your alternative with spending your spare time, often the book you have read will be Radar Foundations for Imaging and Advanced Concepts (Electromagnetics and Radar).

#### **Arthur Haase:**

The book untitled Radar Foundations for Imaging and Advanced Concepts (Electromagnetics and Radar) contain a lot of information on that. The writer explains your girlfriend idea with easy method. The language is very straightforward all the people, so do not worry, you can easy to read this. The book was written by famous author. The author provides you in the new age of literary works. You can read this book because you can continue reading your smart phone, or program, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site along with order it. Have a nice read.

#### **Bryan Foxworth:**

As a scholar exactly feel bored in order to reading. If their teacher inquired them to go to the library or make summary for some reserve, they are complained. Just tiny students that has reading's spirit or real their passion. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that studying is not important, boring as well as can't see colorful pics on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Radar Foundations for Imaging and Advanced Concepts (Electromagnetics and Radar) can make you really feel more interested to read.
