Affective Computing and Intelligent Interaction: First International Conference, ACII 2005, Beijing, China, October 22-24, 2005, Proceedings (Lecture Notes in Computer Science)

This volume contains the proceedings of the 1st International Conference on Affective Computing and Intelligent Interaction (ACII 2005) held in Beijing, China, on 22–24 October 2005. Traditionally, the machine end of human–machine interaction has been very passive, and certainly has had no means of recognizing or expressing affective information. But without the ability to process such information, computers cannot be expected to communicate with humans in a natural way. The ability to recognize and express affect is one of the most important features of human beings. We therefore expect that computers will eventually have to have the ability to process affect and to interact with human users in ways that are similar to those in which humans interact with each other. Affective computing and intelligent interaction is a key emerging technology that focuses on myriad aspects of the recognition, understanding, and expression of affective and emotional states by computers. The topic is currently a highly active research area and is receiving increasing attention. This strong interest is driven by a wide spectrum of promising applications such as virtual reality, network games, smart surveillance, perceptual interfaces, etc. Affective computing and intelligent interaction is a multidisciplinary topic, involving psychology, cognitive science, physiology and computer science. ACII 2005 provided a forum for scientists and engineers to exchange their technical results and experiences in this fast-moving and exciting field. A total of 45 oral papers and 82 poster papers included in this volume were selected from 205 contributions submitted by researchers worldwide.

From reader reviews:

David Jones:

Nowadays reading books be a little more than want or need but also get a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge even the information inside the book in which improve your knowledge and information. The info you get based on what kind of reserve you read, if you want send more knowledge just go with education books but if you want really feel happy read one with theme for entertaining for instance comic or novel. Typically the Affective Computing and Intelligent Interaction: First International Conference, ACII 2005, Beijing, China, October 22-24, 2005, Proceedings (Lecture Notes in Computer Science) is kind of e-book which is giving the reader capricious experience.

Gayle Stalder:

People live in this new morning of lifestyle always try to and must have the time or they will get large amount of stress from both daily life and work. So , when we ask do people have extra time, we will say absolutely sure. People is human not a robot. Then we inquire again, what kind of activity have you got when the spare time coming to a person of course your answer will certainly unlimited right. Then ever try this one, reading publications. It can be your alternative with spending your spare time, often the book you have read will be Affective Computing and Intelligent Interaction: First International Conference, ACII 2005, Beijing, China, October 22-24, 2005, Proceedings (Lecture Notes in Computer Science).

Lisa Walker:

Don't be worry in case you are afraid that this book may filled the space in your house, you can have it in e-book means, more simple and reachable. This particular Affective Computing and Intelligent Interaction: First International Conference, ACII 2005, Beijing, China, October 22-24, 2005, Proceedings (Lecture Notes in Computer Science) can give you a lot of good friends because by you taking a look at this one book you have thing that they don't and make a person more like an interesting person. This book can be one of a step for you to get success. This book offer you information that might be your friend doesn't learn, by knowing more than some other make you to be great individuals. So , why hesitate? Let's have Affective Computing and Intelligent Interaction: First International Conference, ACII 2005, Beijing, China, October 22-24, 2005, Proceedings (Lecture Notes in Computer Science).

Fred Scott:

As a student exactly feel bored for you to reading. If their teacher requested them to go to the library or even make summary for some reserve, they are complained. Just little students that has reading's heart and soul or real their interest. They just do what the teacher want, like asked to go to the library. They go to presently there but nothing reading seriously. Any students feel that reading through is not important, boring as well as

can't see colorful photos on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Affective Computing and Intelligent Interaction: First International Conference, ACII 2005, Beijing, China, October 22-24, 2005, Proceedings (Lecture Notes in Computer Science) can make you experience more interested to read.
