A beautiful world guide to the brown bean.

Taking the reader on a global tour of coffee-growing countries, *The World Atlas of Coffee* presents the bean in full-color photographs and concise, informative text. It shows the origins of coffee -- where it is grown, the people who grow it; and the cultures in which coffee is a way of life -- and the world of consumption -- processing, grades, the consumer and the modern culture of coffee.

Plants of the genus *Coffea* are cultivated in more than 70 countries but primarily in equatorial Latin America, Southeast Asia and Africa. For some countries, including Central African Republic, Colombia, Ethiopia, and Honduras, coffee is the number one export and critical to the economy.

Beautiful color photographs taken in the field. Americans consume 400 million cups of coffee per day, equivalent to 146 billion cups of coffee per year, making the United States the leading consumer of coffee in the world. *The World Atlas of Coffee* is an excellent choice for these coffee lovers.
