## **Industrial Chemistry (De Gruyter Graduate)** Mark Anthony Benvenuto

Industrial Chemistry is a book that brings the subject matter of a chemistry curriculum to life. It examines the major chemistry performed by industry and looks at how such chemical processes affect our lives. In addition, as each process is presented and examined, there is a significant discussion dedicated on the by-products, pollution, necessary waste generated, and attempts to make each process more ecologically friendly, or "greener." It bridges the divide between the basic chemistry that students learn in the undergraduate curriculum, and the broader chemical processes that are used in real life.
