The Alex Cave Series. Book 2. Cold Energy (Volume 2) James M Corkill

The Polar Ice Sheet mysteriously expands by thousands of square miles in a matter of minutes, changing weather patterns on a global scale.

In this action packed science fiction adventure from bestselling author, James M. Corkill, geologist Alex Cave receives an urgent message about the expanding ice sheet creating a Polar Vortex, and discovers the new ice is crystal-clear, freezing so fast a pod of whales and a cargo ship are trapped inside.

He also learns about a destructive earthquake in Victoria, Canada, which had also awakened the sleeping Mount Baker Volcano, where his family lives.

He and his friends begin a desperate race from Seattle to the Arctic Ocean on a high-tech research ship named Mystic. When they reach an unknown island in the Bering Sea, they discover a spaceship, partially buried in the dormant volcano for 180 million years. Inside the cargo hold is a piece of advanced technology, the source of the sudden freezing temperatures. If Alex can't find a way to shut it down, the planet will enter a new ice age.

Can Alex and his friends find a solution for this dire situation? Find out in this epic adventure by James M. Corkill.
