J.C. Willems, J.W. Polderman

Introduction to Mathematical Systems Theory: A Behavioral Approach (Texts in Applied Mathematics) J.C. Willems, J.W. Polderman

Using the behavioural approach to mathematical modelling, this book views a system as a dynamical relation between manifest and latent variables. The emphasis is on dynamical systems that are represented by systems of linear constant coefficients. The first part analyses the structure of the set of trajectories generated by such dynamical systems, and derives the conditions for two systems of differential equations to be equivalent in the sense that they define the same behaviour. In addition the memory structure of the system is analysed through state space models. The second part of the book is devoted to a number of important system properties, notably controllability, observability, and stability. In the third part, control problems are considered, in particular stabilisation and pole placement questions. Suitable for advanced undergraduate or beginning graduate students in mathematics and engineering, this text contains numerous exercises, including simulation problems, and examples, notably of mechanical systems and electrical circuits.

From reader reviews:

Steven Williams:

The book Introduction to Mathematical Systems Theory: A Behavioral Approach (Texts in Applied Mathematics) can give more knowledge and information about everything you want. Why then must we leave the great thing like a book Introduction to Mathematical Systems Theory: A Behavioral Approach (Texts in Applied Mathematics)? A number of you have a different opinion about book. But one aim that book can give many info for us. It is absolutely appropriate. Right now, try to closer along with your book. Knowledge or info that you take for that, you can give for each other; you may share all of these. Book Introduction to Mathematical Systems Theory: A Behavioral Approach (Texts in Applied Mathematics) has simple shape but the truth is know: it has great and large function for you. You can look the enormous world by open and read a e-book. So it is very wonderful.

David Lussier:

The experience that you get from Introduction to Mathematical Systems Theory: A Behavioral Approach (Texts in Applied Mathematics) will be the more deep you searching the information that hide in the words the more you get enthusiastic about reading it. It does not mean that this book is hard to recognise but Introduction to Mathematical Systems Theory: A Behavioral Approach (Texts in Applied Mathematics) giving you buzz feeling of reading. The article author conveys their point in specific way that can be understood by simply anyone who read it because the author of this guide is well-known enough. This specific book also makes your current vocabulary increase well. That makes it easy to understand then can go together with you, both in printed or e-book style are available. We advise you for having this kind of Introduction to Mathematical Systems Theory: A Behavioral Approach (Texts in Applied Mathematics) instantly.

Barbara Fontenot:

Spent a free time to be fun activity to perform! A lot of people spent their free time with their family, or their own friends. Usually they doing activity like watching television, about to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Could be reading a book can be option to fill your free of charge time/ holiday. The first thing that you ask may be what kinds of book that you should read. If you want to try look for book, may be the reserve untitled Introduction to Mathematical Systems Theory: A Behavioral Approach (Texts in Applied Mathematics) can be great book to read. May be it can be best activity to you.

Miranda Durkee:

People live in this new time of lifestyle always aim to and must have the time or they will get great deal of stress from both way of life and work. So, if we ask do people have extra time, we will say absolutely without a doubt. People is human not really a robot. Then we consult again, what kind of activity have you

got when the spare time coming to an individual of course your answer can unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative in spending your spare time, the book you have read will be Introduction to Mathematical Systems Theory: A Behavioral Approach (Texts in Applied Mathematics).
