## Diabetes and Ocular Disease: Past, Present, and Future Therapies (American Academy of Ophthalmology Monograph Series)

Diabetes mellitus is a complex, multifactorial disease often associated with progressive retinopathy and visual loss. *Diabetes and Ocular Disease* compiles current basic-science and clinical information from leading authorities on treatment strategies for diabetic eye disease. It also includes both the guidelines established by the collaborative studies in Diabetes 2000 and the concepts of disease mechanisms and clinical management that have subsequently evolved. This monograph will provide practitioners with a concise, up-to-date, practical reference for the diagnosis and management of ocular disease in diabetic patients.
