Michael B. Miller

Mathematics and Statistics for Financial Risk Management Michael B. Miller

Mathematics and Statistics for Financial Risk Management is a practical guide to modern financial risk management for both practitioners and academics.

Now in its second edition with more topics, more sample problems and more real world examples, this popular guide to financial risk management introduces readers to practical quantitative techniques for analyzing and managing financial risk.

In a concise and easy-to-read style, each chapter introduces a different topic in mathematics or statistics. As different techniques are introduced, sample problems and application sections demonstrate how these techniques can be applied to actual risk management problems. Exercises at the end of each chapter and the accompanying solutions at the end of the book allow readers to practice the techniques they are learning and monitor their progress. A companion Web site includes interactive Excel spreadsheet examples and templates.

Mathematics and Statistics for Financial Risk Management is an indispensable reference for today's financial risk professional.

From reader reviews:

Mae Saari:

In this 21st centuries, people become competitive in every single way. By being competitive at this point, people have do something to make these people survives, being in the middle of the crowded place and notice through surrounding. One thing that often many people have underestimated the idea for a while is reading. Yeah, by reading a reserve your ability to survive raise then having chance to remain than other is high. For you personally who want to start reading some sort of book, we give you that Mathematics and Statistics for Financial Risk Management book as beginner and daily reading reserve. Why, because this book is greater than just a book.

Ann Strickland:

As people who live in the actual modest era should be up-date about what going on or facts even knowledge to make these keep up with the era and that is always change and make progress. Some of you maybe will probably update themselves by reading books. It is a good choice for you personally but the problems coming to you actually is you don't know what one you should start with. This Mathematics and Statistics for Financial Risk Management is our recommendation to help you keep up with the world. Why, since this book serves what you want and need in this era.

Keith Karam:

Nowadays reading books are more than want or need but also turn into a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge even the information inside the book which improve your knowledge and information. The info you get based on what kind of guide you read, if you want have more knowledge just go with knowledge books but if you want truly feel happy read one having theme for entertaining for instance comic or novel. Typically the Mathematics and Statistics for Financial Risk Management is kind of reserve which is giving the reader unstable experience.

Robert Mayo:

As a scholar exactly feel bored to be able to reading. If their teacher questioned them to go to the library as well as to make summary for some e-book, they are complained. Just little students that has reading's soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that reading through is not important, boring as well as can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Mathematics and Statistics for Financial Risk Management can make you truly feel more interested to read.
