Routledge Handbook of Heritage in Asia (Routledge Handbooks)

This Handbook is the first major volume to examine the conservation of Asia's culture and nature in relation to the wider social, political and economic forces shaping the region today.

Throughout Asia rapid economic and social change means the region's heritage is at once under threat and undergoing a revival as never before. As societies look forward, competing forces ensure they re-visit the past and the inherited, with the conservation of nature and culture now driven by the broader agendas of identity politics, tradition, revival, rapid development, environmentalism and sustainability. In response to these new and important trends, the twenty three accessible chapters here go beyond sector specific analyses to examine heritage in inter-disciplinary and critically engaged terms, encompassing the natural and the cultural, the tangible and intangible. Emerging environmentalisms, urban planning, identity politics, conflict memorialization, tourism and biodiversity are among the topics covered here.

This path-breaking volume will be of particular interest to students and scholars working in the fields of heritage, tourism, archaeology, Asian studies, geography, anthropology, development, sociology, and cultural and postcolonial studies.
