Case Studies in Clinical Laboratory Science Linda Graves Ed.D. MT (ASCP), Elizabeth Gockel-Blessing

This unique collection of 55 *multidisciplinary* case studies is designed to help laboratory technologists and technicians "experience" how departments work together to help the physician make a diagnosis and determine the best course of treatment for the patient. In working through the comprehensive, real-world scenarios, readers deal firsthand with interpreting data from two, three or four disciplines (Blood Bank, Chemistry, Hematology, Immunology, Microbiology, Urinalysis), *integrating* the facts (laboratory data) from different departments and thinking *critically* about what they mean. Includes 55 cases--11 Blood Bank cases; 12 Chemistry cases; 10 Hematology/Coagulation cases; 5 Immunology/Serology cases; 10 Microbiology cases; 7 Urinalysis cases. Technicians and technologists who have been out of the field for awhile and are in the process of reentry into the profession and technicians and technologists who are looking for a general review of clinical laboratory science.
