## **Manufacturing Planning and Control: A Reference Model (Manufacturing Research and Technology)**

F.P.M. Biemans

Production organisations are now manufacturing a wide variety of products with increasingly shorter life cycles. Managing such organisations is a complicated task. A primary reason for the complexity is the lack of clarity as to how modifications of the components of the production organization affect the performance of the organisation as a whole. What ultimately matters is the 'bottom line' efficiency and flexibility of the overall production organisation.

This book focuses on how changes to the production components affect the organisation as a whole. Solutions are outlined based on concepts from Information Science and Systems Theory; knowledge of manufacturing as an application domain; and experience with the design of computerised factory control systems. More specifically, it describes the development of a reference model, which represents an idealised production organisation, defining the global tasks of its components as well as the relations between the components and the whole. A systems view of a production organisation is given, encompassing all aspects of production and management.

Pointers are also included on how to complete functional specifications for components in a computerised production organisation. The reference model can also be applied to the analysis and rationalisation of non-automated or partially automated production organisations.

This work addresses people studying the control organisation and procedures in factories, people responsible for the overall design of computerised manufacturing control systems, and developers of algorithms for manufacturing planning and control. The book will also be of interest to designers of large-scale systems in general.

### **From reader reviews:**

#### **Jesse Williams:**

Information is provisions for those to get better life, information presently can get by anyone in everywhere. The information can be a knowledge or any news even a problem. What people must be consider if those information which is in the former life are challenging be find than now could be taking seriously which one works to believe or which one typically the resource are convinced. If you get the unstable resource then you buy it as your main information we will see huge disadvantage for you. All those possibilities will not happen in you if you take Manufacturing Planning and Control: A Reference Model (Manufacturing Research and Technology) as your daily resource information.

#### **Quentin Ryan:**

You can find this Manufacturing Planning and Control: A Reference Model (Manufacturing Research and Technology) by go to the bookstore or Mall. Only viewing or reviewing it may to be your solve challenge if you get difficulties for the knowledge. Kinds of this book are various. Not only by means of written or printed but also can you enjoy this book by e-book. In the modern era similar to now, you just looking by your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose right ways for you.

#### **Paul Dubose:**

What is your hobby? Have you heard that will question when you got scholars? We believe that that question was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And you know that little person just like reading or as examining become their hobby. You should know that reading is very important and also book as to be the matter. Book is important thing to include you knowledge, except your current teacher or lecturer. You find good news or update with regards to something by book. A substantial number of sorts of books that can you go onto be your object. One of them is this Manufacturing Planning and Control: A Reference Model (Manufacturing Research and Technology).

#### **David Saenz:**

Reading a guide make you to get more knowledge from that. You can take knowledge and information from a book. Book is composed or printed or highlighted from each source which filled update of news. Within this modern era like at this point, many ways to get information are available for a person. From media social just like newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just looking for the Manufacturing Planning and Control: A Reference Model (Manufacturing Research and Technology) when you required it?
