This extensive, edited volume showcases established and emerging scholars in the field of Teaching Assistant (TA) and International Teaching Assistant (ITA) education. Working Theories goes beyond reporting good practices or program descriptions, which typically comprises many books on TA and ITA development. Instead, Working Theories places time-tested, robust theories, frameworks, and models of TA and ITA learning and development at the center of graduate student education by providing a scholarly venue for description, explication, and application of these theories. In turn, these theories and models from psychology, sociology, pedagogy, discourse analysis, and second language learning will be presented in such a way as to inform good practice, but above all, motivate future research.
