## INTRODUCTION:

Over the years, people have invented ways of keeping themselves busy-away from the usual activities aimed generating income to earn a living. For kids, something has to be available to keep them away from mischief. Well, all work and no play makes Jack a dull boy as they say. That is why humans always seek some time off work to relax their minds and put aside their usual day to day business. It is in this spirit that many games have been invented, not only for kids who need a little pleasure away from school, but for adults as well.

One of the games that has been coined is the Minecraft. Originally created by a Swedish programmer known as Markus Notch Person, this game was later developed by Mojang who also published it. The first release of the PC was on May the 17th of 2009, which came in an alpha development version. The full release was published on November 18th 2011, after a series of gradual updates. The Android version was released earlier on in October 7th, while the iOS version came in November 17th. The game was released on May 9th 2012 on Xbox 360 as an Xbox Live Arcade game that was co-developed by 4J studios. Well, all these versions get up-dated periodically.

The game has received five awards from the 2011 Game Development Conference and awarded the Innovation Award. It also got the Best Downloadable Game Award and the Best Debut Game Award from Game Development Choice Awards. Other achievements include hen considering a game for both the kids and adults, Minecraft may just be one among the choices. After having the information about it, it will be easier to make informed decision.
