Opportunities in Protection Materials Science and Technology for Future Army Applications

Committee on Opportunities in Protection Materials Science and Technology for Future Army Applications, National Materials and Manufacturing Board, Board on Army Science and Technology, Division on Engineering and Physical Sciences, National Research Council

Armor plays a significant role in the protection of warriors. During the course of history, the introduction of new materials and improvements in the materials already used to construct armor has led to better protection and a reduction in the weight of the armor. But even with such advances in materials, the weight of the armor required to manage threats of ever-increasing destructive capability presents a huge challenge.

Opportunities in Protection Materials Science and Technology for Future Army Applications explores the current theoretical and experimental understanding of the key issues surrounding protection materials, identifies the major challenges and technical gaps for developing the future generation of lightweight protection materials, and recommends a path forward for their development. It examines multiscale shockwave energy transfer mechanisms and experimental approaches for their characterization over short timescales, as well as multiscale modeling techniques to predict mechanisms for dissipating energy. The report also considers exemplary threats and design philosophy for the three key applications of armor systems: (1) personnel protection, including body armor and helmets, (2) vehicle armor, and (3) transparent armor.

Opportunities in Protection Materials Science and Technology for Future Army Applications recommends that the Department of Defense (DoD) establish a defense initiative for protection materials by design (PMD), with associated funding lines for basic and applied research. The PMD initiative should include a combination of computational, experimental, and materials testing, characterization, and processing research conducted by government, industry, and academia.

From reader reviews:

Deborah Allen:

The book Opportunities in Protection Materials Science and Technology for Future Army Applications can give more knowledge and information about everything you want. So why must we leave a good thing like a book Opportunities in Protection Materials Science and Technology for Future Army Applications? A few of you have a different opinion about guide. But one aim which book can give many facts for us. It is absolutely correct. Right now, try to closer with your book. Knowledge or info that you take for that, you are able to give for each other; you can share all of these. Book Opportunities in Protection Materials Science and Technology for Future Army Applications has simple shape however you know: it has great and large function for you. You can appear the enormous world by available and read a e-book. So it is very wonderful.

Kimberly Niemeyer:

Do you considered one of people who can't read satisfying if the sentence chained from the straightway, hold on guys this aren't like that. This Opportunities in Protection Materials Science and Technology for Future Army Applications book is readable by means of you who hate the perfect word style. You will find the data here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to provide to you. The writer involving Opportunities in Protection Materials Science and Technology for Future Army Applications content conveys the thought easily to understand by a lot of people. The printed and e-book are not different in the information but it just different in the form of it. So , do you even now thinking Opportunities in Protection Materials Science and Technology for Future Army Applications is not loveable to be your top listing reading book?

Robert Leggett:

This book untitled Opportunities in Protection Materials Science and Technology for Future Army Applications to be one of several books in which best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit into it. You will easily to buy this specific book in the book retailer or you can order it by using online. The publisher of the book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Smart phone. So there is no reason for you to past this reserve from your list.

Ella McCoy:

People live in this new day of lifestyle always try to and must have the extra time or they will get lots of stress from both day to day life and work. So , if we ask do people have extra time, we will say absolutely

yes. People is human not a robot. Then we request again, what kind of activity do you have when the spare time coming to a person of course your answer can unlimited right. Then do you try this one, reading books. It can be your alternative within spending your spare time, often the book you have read is definitely Opportunities in Protection Materials Science and Technology for Future Army Applications.
