Paul Monk, Lindsey J. Munro

**Maths for Chemistry: A chemist's toolkit of calculations** Paul Monk, Lindsey J. Munro

Mathematical skills and concepts lie at the heart of chemistry; however, they are also often the aspects of the subject that students fear the most. Now in a new edition, *Maths for Chemistry* addresses the challenges faced by many students in acquiring the math skills necessary to gain a full understanding of chemistry. Working from basic yet essential principles, this unique text builds students' confidence by leading them through the subject in a steady, progressive way, moving from basic algebra all the way to quantum mathematics. Employing a modular structure, authors Paul Monk and Lindsey J. Munro present the material in short, manageable sections in order to keep the content as accessible as possible.

Opening with an introduction to the "language" of math and the fundamental rules of algebra, *Maths for Chemistry* goes on to cover powers, indices, logs and exponential functions, graphical functions, and trigonometry before leading students through both differentiation and integration and on to quantum mathematics. It is the first book of its kind to use chemical examples throughout in order to demonstrate the relevance of mathematical concepts to the study of chemistry. The volume is enhanced by definitions of all key terms, self-check questions, and extensive end-of-chapter problems. A Companion Website features additional resources for both students and instructors.

### **From reader reviews:**

#### **Jennifer Oaks:**

Book is to be different for each and every grade. Book for children until finally adult are different content. As you may know that book is very important normally. The book Maths for Chemistry: A chemist's toolkit of calculations was making you to know about other know-how and of course you can take more information. It is very advantages for you. The e-book Maths for Chemistry: A chemist's toolkit of calculations is not only giving you more new information but also to be your friend when you feel bored. You can spend your own personal spend time to read your publication. Try to make relationship together with the book Maths for Chemistry: A chemist's toolkit of calculations. You never feel lose out for everything in case you read some books.

#### **Charles Montiel:**

A lot of people always spent their own free time to vacation or perhaps go to the outside with them household or their friend. Are you aware? Many a lot of people spent they will free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity this is look different you can read any book. It is really fun for you. If you enjoy the book that you simply read you can spent the entire day to reading a reserve. The book Maths for Chemistry: A chemist's toolkit of calculations it is rather good to read. There are a lot of those who recommended this book. These were enjoying reading this book. If you did not have enough space to bring this book you can buy often the e-book. You can m0ore very easily to read this book from the smart phone. The price is not to fund but this book has high quality.

#### **Ethel Orr:**

Beside that Maths for Chemistry: A chemist's toolkit of calculations in your phone, it may give you a way to get nearer to the new knowledge or details. The information and the knowledge you can got here is fresh from the oven so don't become worry if you feel like an older people live in narrow commune. It is good thing to have Maths for Chemistry: A chemist's toolkit of calculations because this book offers to you readable information. Do you at times have book but you seldom get what it's facts concerning. Oh come on, that won't happen if you have this with your hand. The Enjoyable set up here cannot be questionable, including treasuring beautiful island. So do you still want to miss the idea? Find this book in addition to read it from today!

#### **Chuck Bryson:**

A lot of publication has printed but it is unique. You can get it by internet on social media. You can choose the very best book for you, science, comedy, novel, or whatever by searching from it. It is called of book Maths for Chemistry: A chemist's toolkit of calculations. You can add your knowledge by it. Without making the printed book, it may add your knowledge and make you happier to read. It is most essential that, you must aware about reserve. It can bring you from one place to other place.
