The Ethics and Conduct of Lawyers in England and Wales: Second Edition Andrew Boon, Jennifer Levin

This is the second edition of a path-breaking text which successfully maps the complex regulatory environment in which the legal profession in England and Wales operates in the 21st century. The authors offer a critical overview of how the professional ethic of lawyers has been constructed and where its sources of ideals, organization, power, and culture are located. The book also examines the professional governance structures which operate today - in particular, how regulation, discipline, and education interact, and with what success. Detailed chapters examine the duties owed to clients (conflicts of interest, confidentiality, fees and costs, diligence) and to others (for instance, the profession and society), and the notion of public service is critically examined. A final part of the book looks at dispute settlement (litigation, negotiation, advocacy, and alternative dispute settlement). This updated edition takes into consideration the many changes in the law, the codes, and the policies of the UK government and the professions that have occurred since the first edition. The authors illuminate the book with their quest for guiding principles against which the suitability and efficacy of structures and codes that have existed for decades, or even centuries, can be judged. They question whether the professions are suitably regulated in an era of sustained and continuous change.
