Bullying involves the repeated abuse of power in relationships. Bullying in schools can blight the lives of victims and damage the climate of the school. Over the last 25 years a burgeoning research program on school bullying has led to new insights into effective ways of dealing with it, as well as new challenges such as the advent of cyberbullying.

This new book, by a leading international expert on the topic, brings together the cumulative knowledge acquired and the latest research findings in the area, with a global perspective especially covering research in Europe, North America, Australasia, and Asia. It will appeal to those taking academic courses in psychology, social work, educational psychology, child clinical psychology and psychiatry, and teacher training, but it will also be of interest to parents and teachers.
