Basic approaches to discrete simulation have been process simulation languages (e.g., GPSS) and event-scheduling type (e.g., SIMSCRIPT). The trade-offs are that event-scheduling languages offer more modeling flexibility and process-oriented languages are more intuitive to the user. With these considerations in mind, authors David Elizandro and Hamdy Taha embarked on the development of a new discrete simulation environment that is easy to use, yet flexible enough to model complex production systems. They introduced this environment, Design Environment for Event Driven Simulation (DEEDS), in *Simulation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA*. The DEEDS environment is itself an Excel/VBA add-in.

Based on this foundation, the second edition, now titled **Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA** incorporates the use of discrete simulation to statistically analyze a system and render the most efficient time sequences, designs, upgrades, and operations. This updated edition includes new visualization graphics for DEEDS software, improvements in the optimization of the simulation algorithms, a new chapter on queuing models, and an Excel 2007 version of the DEEDS software. Organized into three parts, the book presents concepts of discrete simulation, covers DEEDS, and discusses a variety of applications using DEEDS.

The flexibility of DEEDS makes it a great tool for students or novices to learn concepts of discrete simulation and this book can form the basis of an introductory undergraduate course on simulation. The expanded depth of coverage in the second edition gives it a richness other introductory texts do not have and provides practitioners a reference for their simulation projects. It may also be used as a research tool by faculty and graduate students who are interested in "optimizing" production systems.

From reader reviews:

Serafina Hayes:

The book Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition can give more knowledge and information about everything you want. Why then must we leave the best thing like a book Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition? A few of you have a different opinion about book. But one aim that book can give many info for us. It is absolutely appropriate. Right now, try to closer with the book. Knowledge or information that you take for that, it is possible to give for each other; it is possible to share all of these. Book Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition has simple shape however, you know: it has great and large function for you. You can seem the enormous world by start and read a publication. So it is very wonderful.

Helen Green:

Reading a reserve tends to be new life style in this particular era globalization. With studying you can get a lot of information that could give you benefit in your life. Along with book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their reader with their story or maybe their experience. Not only the story that share in the ebooks. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors nowadays always try to improve their talent in writing, they also doing some analysis before they write for their book. One of them is this Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition.

Joey Leigh:

Are you kind of busy person, only have 10 or perhaps 15 minute in your moment to upgrading your mind skill or thinking skill actually analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your small amount of time to read it because all this time you only find book that need more time to be go through. Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition can be your answer given it can be read by you actually who have those short time problems.

Francis King:

What is your hobby? Have you heard in which question when you got pupils? We believe that that question was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person like reading or as studying become their hobby. You have to know that reading is very important and also book as to be the point. Book is important thing to increase you knowledge, except your current teacher or lecturer. You will find good news or update regarding something by book. Amount

types of books that can you choose to use be your object. One of them is actually Performance Evaluation of Industrial Systems: Discrete Event Simulation in Using Excel/VBA, Second Edition.
